

<p>Tanta university faculty of Medicine Anesthesia & SICU Date 4/5/2017</p>	<p>Master2nd part of Anesthesia & SICU Paper2 Time allowed: 3hr Total marks 50</p>	
--	---	---

1-2month old infant presented with pyloric stenosis, the patient had 3days history of projectile vomiting

- **Describe preoperative preparation of this child (15marks)**

2-Prescribe guideline for management of unanticipated difficult tracheal intubation (5markes)

3- Plan how to minimize transfusion requirement during spinal surgery (10marks)

4--Demonstrate peri operative complication of subtotal thyroidectomy (10marks)

5-Demonstrate causes and management of hypoventilation immediately following anesthesia (10marks)

**Oral exam
9/5/2017**

Good luck

<p>Tanta university faculty of Medicine Anesthesia & SICU Date 30/4/2017</p>	<p>Master 2nd part of Anesthesia & SICU Paper 1 Time allowed: 3hr Total marks 50</p>	
---	---	---

- 1- A 65-year-old woman is admitted to ICU unconscious with a temperature of 20°C.
 - 1-Demonstrate effects of hypothermia (5marks)
 - 2-Management of the hypothermic patient (5marks)

- 2- Prescribe criteria of weaning from mechanical ventilation and demonstrate causes of weaning difficulty (10mark)

3. Ventilator associated pneumonia (VAP) is common in ICU
 - 1-Define ventilator associated pneumonia (VAP) (2marks)
 - 2-List the factors that increase the risk of the development of VAP. (4 marks)
 3. Demonstrate measures may reduce the risk of development of VAP (4marks)

- 4- Providing postoperative analgesia for female patient after abdominal hysterectomy and give a possible advantage & disadvantage of each. (10 marks)

- 5 - Demonstrate problems are commonly with one-lung ventilation and how manage these problems (10marks)

Good luck

Tanta university faculty of Medicine Anesthesia & SICU Date15/4/2017	Master2nd part of Anesthesia & SICU Paper2 Time allowed: 3hr Total marks 50	
---	--	---

- 1-Design plan for post-operative pain management in hip fracture (10marks)**
- 2- Explain causes of supraventricular tachycardia during general anesthesia and plan its management (10marks)**
- 3- Prescribe precaution to avoid intra uterine fetal asphyxia in pregnant woman undergoing appendectomy (10marks)**
- 4- Demonstrate potential complication of prone position and how can be avoided (5marks)**
- 5- Plan how to minimize blood transfusion requirement (15marks)**

**Oral exam
23/4/2017**

Good luck

<p>Tanta university faculty of Medicine Anesthesia & SICU Date 10/4/2017</p>	<p>Master 2nd part of Anesthesia & SICU Paper 1 Time allowed: 3hr Total marks 50</p>	
---	---	---

- 1- Full term 3kg infant was brought to repair congenital diaphragmatic hernia
 - Demonstrate peri operative problems (10marks)
 - Describe management of these problems (10marks)
- 2- Describe the management of diabetic ketoacidosis (5marks)
- 3- -plan management of aspiration pneumonitis (5marks)
- 4-Demonstrate Fluid and nutritional resuscitation for a 3rd degree burnt patient (10marks)
- 5-Demonstrate predictor alert you patient might be difficult to intubate and Plan algorithm for difficult intubation (10marks)

Good luck

Oral exam 23/ 4 /2017
